Sir:

of Correction

Patentees note that an error of a typographical nature or character appears in the abovereferenced patent as a result of a U.S. Patent and Trademark Office (USPTO) mistake. The attached Form PTO-1050, in duplicate, describes the error in detail. Patentees respectfully request that the Commissioner issue a Certificate of Correction to correct the error appearing in the printed patent. Correction thereof does not involve such changes in the patent that would constitute new matter or require re-examination.

The title page of the patent includes a reference to a Terminal Disclaimer filed by the Applicant in connection with the corresponding patent application. However, a review of the prosecution file history does not identify a submission of a Terminal Disclaimer by the Applicant

I hereby certify that this Request for Certificate of Correction, along with any documents indicated as being attached, is being deposited on the date shown below with the United Steres Postal Service as first class mail in an envelope addressed to Certificate of Correction Branch, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

or a USPTO requirement for the Applicant to submit a Terminal Disclaimer in support of the application. This reference to the Terminal Disclaimer, therefore, appears to be a USPTO printing error. Accordingly, Patentees request that the reference to a Terminal Disclaimer be removed from the title page of the patent grant.

Patentees submit that consideration of this paper does not require a fee. However, Patentees hereby authorizes the Commissioner to charge any necessary fee to Deposit Account No. 11-0980.

If any issues exist that can be resolved by a telephone conference, please contact the undersigned attorney at the number provided below.

Respectfully submitted,

V. Scott Petty

57) ABSTRACT

A method of reducing the amount of computer memory utilized in calculating a formula on a collection of a plurality of series of data values, the method including the steps of:
(a) for each data value member of at least one series of the collection, determining the size of a window of data values required to calculate the formula; (b) obtaining the size of the window required for the at least one series on the basis of the determination, and (c) utilizing the window having the predetermined size to determine data values to be stored in computer memory when calculating the formula when applied to other series of data values in the collection.
